EXPERIENCE

Web Development Intern
Ferry App Services

📅 August 2022 – September 2022   📍 New Delhi

- Collaborated with the development team to make significant enhancements to the several websites, implementing key changes to improve user experience and functionality.
- Successfully executed website updates, ensuring accurate content, optimized performance, and adherence to design specifications.
- Actively participated in brainstorming sessions, providing valuable insights, and contributing to the ideation.

PROJECTS

CURRENTSYNC
Self-Learning Project

📅 February 21

- Developed a responsive web application, CurrentSync , using React.js to provide live news updates from various sources
- Integrated a news API to fetch real-time news articles and data.
- Utilized React components and state management to efficiently render and update news content

INOTEBOOK
Self-Learning Project

📅 January 2022

- Developed iNotebook, a web application, utilizing the MERN stack.
- Created a custom API and seamlessly integrated it with a cloud database on MongoDB Atlas, enabling users to securely store and retrieve their notes from anywhere.
- Implemented CRUD functionality, allowing users to efficiently manage their notes and ensuring a smooth user experience.

FAISHOTO
E-commerce Project

📅 July 23

- Developed the frontend of an e-commerce platform using React.js.
- Utilized Material UI to design and implement the user interface components.
- Employed Strapi.io as the backend content management system.
- Integrated Stripe as the payment gateway for secure online transactions.

ACHIEVEMENTS

- Top 4 in 100 teams in Hack.it@Bvp '23 for a Hardware based SOS button.
- Finalist in EduHack BVP '23.
